this book constitutes a valuable manual for young and seasoned business researchers alike and provides a comprehensive summary for the whole research journey it is a must read for all researchers who need to understand the basics of business research from identifying research topics to planning and organizing the research process and selecting the most appropriate methodology for the topic at hand this book also provides insights on how to avoid common pitfalls in business research and outlines the research skills needed to write a fine piece of research in order to capture the innovative element of research the book also highlights methods for thinking outside the box it also stresses the importance of respecting

ethics while conducting business research lastly it presents important cases and provides hands on training for preparing survey tools readers looking to master business research won't want to miss out on this unique and insightful book

emerging from the fields of ecological restoration and economics this interdisciplinary book delivers a clear path to restoring our economies in a way that speaks well to industry groups and business owners students and the general public and to policy makers there are proven relationships between ecology and economics giordanengo employs those relationships in an intriguing way and integrates them with global case studies to argue that redesigning economic systems according to ecological principles is necessary to balancing critical social environmental and economic goals for example he reveals how more obscure ecological principles and theories succession evolution diversity productivity curves and so on can inform the restructuring of economic systems that are resilient productive and regenerative a variety of students and practitioners have read the first edition or attended john s seminars only to remark why haven't we learned this in our traditional coursework or this book brings so much clarity to the fields of sustainability and environmental sciences traditional approaches to sustainability focus on the social environmental and economic pillars of an economy while paying little attention to the foundation those pillars rest upon a comprehensive focus on our economy's foundational components has been ignored for good reason we have lacked an understanding of what they are or how they interact with one another cross cutting research between ecological and economic systems reveals three foundational components i.e. drivers common to both systems the effective management of these components is perhaps the most important obstacle to resolving current tensions between society nature and the global market economy the scale at which diversity energy and trade must be managed is also justified by self regulating ecosystems such as jungles prairies and pine forests that scale is not global nor is it hyper local the economic and ecological rationale agree that the scale of a sustainable economy the natural geography of humans is regional to the contrary the attempt to manage our economy at a global scale has given rise to chronic social environmental and economic symptoms across earth in highly developed countries such as the united states these symptoms include flat real wages and productivity growth a growing wealth gap degraded environmental conditions rising social unrest and more the closing chapters outline a natural path for restoring our economies illuminated by humanities shared experience in ecological restoration the process of ecosystem recovery following disturbance i.e. succession is one such pathway unwittingly developed nations such as the united states manage succession to concentrate wealth into fewer hands while lowering the economy's productive capacity net productivity and resistance to future disturbances economic policies can also move the succession dial toward the productive and diverse center where wealth and resources are recirculated quickly new business opportunities are created and resilience and resistance are fortified a stout shield in the face of global economic turmoil for policymakers consumers and industry groups this book explores root causes of the challenges you face so that you may take deep

correct actions to yield lasting change giordanengo provides critique but goes further with clear steps that individuals businesses communities and policymakers can take to start restoring our economies now from agricultural restoration to regional manufacturing and energy systems he outlines practical strategies and policy mechanisms for building regenerative economies students will find not just theoretical and systems knowledge but applied economics ecology and conservation centered around actionable pathways economic restoration is not only possible it is our humanitarian duty

the first edition of making healthy places offered a visionary and thoroughly researched treatment of the connections between constructed environments and human health since its publication over 10 years ago the field of healthy community design has evolved significantly to address major societal problems including health disparities obesity and climate change most recently the covid 19 pandemic has upended how we live work learn play and travel in making healthy places second edition designing and building for well being equity and sustainability planning and public health experts nisha d botchwey andrew l dannenberg and howard frumkin bring together scholars and practitioners from across the globe in fields ranging from public health planning and urban design to sustainability social work and public policy this updated and expanded edition explains how to design and build places that are beneficial to the physical mental and emotional health of humans while also considering the health of the planet this edition expands the treatment of some topics that received less attention a decade ago such as the relationship of the built environment to equity and health disparities climate change resilience new technology developments and the evolving impacts of the covid 19 pandemic drawing on the latest research making healthy places second edition imparts a wealth of practical information on the role of the built environment in advancing major societal goals such as health and well being equity sustainability and resilience this update of a classic is a must read for students and practicing professionals in public health planning architecture civil engineering transportation and related fields
