sentencing policy and social justice argues that the promotion of social justice should become a key objective of sentencing policy advancing the argument that the legitimacy of sentencing ultimately depends upon the strength of the relationship between social morality and penal ideology it sheds light on how shared moral values can influence sentencing policy at a time when relationships of community appear increasingly fragmented arguing that sentencing will be better placed to make a positive contribution to social justice if it becomes more sensitive to the commonly accepted moral boundaries that underpin adherence to the rule of law the need to reflect public opinion in sentencing has received significant attention more recently with renewed interest in jury sentencing stakeholder sentencing and the involvement of community views when regulating policy the author however advocates a different approach combining a new theoretical focus

with practical suggestions for reform and arguing that the contribution sentencing can make to social justice necessitates a fundamental change in the way shared values about the advantages of punishment are reflected in penal ideology and sentencing policy using examples from international comparative and domestic contexts to advance the moral and ethical case for challenging the existing theories of sentencing the book develops the author's previous theoretical ideas and outlines how these changes could be given practical shape within the context of sentencing in england and wales it assesses the consequences for penal governance due to increased state regulation of discretionary sentencing power and examines the prospects for achieving the kind of moral transformation regarded as necessary to reverse such a move to illustrate these issues each chapter focuses on a particularly problematic area for contemporary sentencing policy namely the sentencing of women the sentencing of irregular migrants sentencing for offences of serious public disorder and sentencing for financial crime

the rhetoric of social justice is commonplace but increasingly it means little more than a tag line or a punctuation point reconstructing social justice presents a new framework for social justice that will change the way people think about social justice and change the way people implement social justice this book carves out an intellectual and practical space for social justice that is distinct from political legal and economic spheres while emphasizing a distinct domain for social justice the author then makes sense of its healing role in terms of the polity economy technology and religion drawing from a rich supply of classroom experiences her research on mosque controversies after september 11 2001 and then the global examples of truth and reconciliation commissions frederking invites the reader to think about the relevance of social justice from the micro to the macro level rather than a set of policy outcomes or ideological positions social justice is a process of social accountability that demands honest and transparent engagement while disagreement is likely and controversy inevitable this social justice process reaffirms our connectedness and moves us forward as a collective
