cultural values and religious beliefs play a substantial role in adolescent development
developmental scientists have shown increasing interest in how culture and religion are involved
in the processes through which adolescents adapt to environments this volume constitutes a
timely and unique addition to the literature on human development from a cultural contextual

perspective editors gisela trommsdorff and xinyin chen present systematic and in depth discussions of theoretical perspectives landmark studies and strategies for further research in the field the eminent contributors reflect diverse cultural perspectives transcending the western emphasis of many previous works this volume will be of interest to scholars and professionals interested in basic developmental processes adolescent social psychology and the sociological and psychological dimensions of religion

new trends in research assessment and treatment are currently visible in the forensic field in three relatively separate areas the use of neuropsychology biomarkers and wearables and vr technology in forensic mental health these areas individually can make a valuable contribution to improving forensic assessments and treatment but combined they might even have a greater impact for example heart rate variability a biomarker can be visualized during virtual reality vr scenarios to increase patients insights into their physiological responses with our topic new directions in forensic psychology applying neuropsychology biomarkers and technology in assessment and intervention we hope to offer more insight into the state of scientific developments in the aforementioned areas as they relate to forensic psychology as a result we hope to be able to pinpoint lacking knowledge and offer suggestions for further research
