this is the disturbing central conclusion of eric hobsbawm's analysis of recent working class history the present volume brings together trade union leaders and labour mps socialist writers and workplace militants to debate hobsbawm's assessment and to explore the situation and prospects of the labour movement so broad a range of contributors has rarely been assembled for a discussion of this kind their essays are remarkable for their candour and clarity and also for the freedom with which they cross the barriers that too often separate political from industrial issues and academic research from the many questions raised by practical struggles nothing more clearly reveals the depth of britain's crisis than the strategic and organizational controversies that currently divide the political and the trade union wings of the labour movement the forward march of labour halted will have an immediate impact both inside the movement and on a wider public from back cover

british economic and industrial policy since 1979 is examined using a wide range of sources was this really new revival of earlier approaches or a rigorous extension of the imf imposed policies on the 1974 79 labour government the question is asked was the creation of a large pool of unemployed labour necessary for reshaping the economy or was the aim to secure fundamental changes in the relations between capital and organised labour due to setbacks suffered by trade unions in the 1980s with factory closures and major job losses the author questions labour s motives in softening any meaningful opposition to the conservatives supporting erm in 1990 reducing the role of trade unions in the party itself and retaining key policies of the thatcher era especially its trade union laws
