this remarkable primate with the curious name is challenging established views on human evolution the bonobo least known of the great apes is a female centered egalitarian species that has been dubbed the make love not war primate by specialists in bonobo society females form alliances to intimidate males sexual behavior in virtually every partner combination replaces aggression and serves many social functions and unrelated groups mingle instead of fighting the species s most striking achievement is not tool use or warfare but sensitivity to others in the first book to combine and compare data from captivity and the field frans de waal a world renowned primatologist and frans lanting an internationally acclaimed wildlife photographer present the most up to date perspective available on the bonobo focusing on social organization de waal compares the bonobo with its better known relative the chimpanzee the bonobo s relatively nonviolent behavior and the tendency for females to dominate males confront the evolutionary models derived from observing the chimpanzee s male power politics cooperative hunting and intergroup warfare further the bonobo s frequent imaginative sexual contacts along with its low reproduction rate belie any notion that the sole natural purpose of sex is procreation humans share over 98 percent of their genetic material with the bonobo and the chimpanzee is it possible

that the peaceable bonobo has retained traits of our common ancestor that we find hard to recognize in ourselves eight superb full color photo essays offer a rare view of the bonobo in its native habitat in the rain forests of zaire as well as in zoos and research facilities additional photographs and highlighted interviews with leading bonobo experts complement the text this book points the way to viable alternatives to male based models of human evolution and will add considerably to debates on the origin of our species anyone interested in primates gender issues evolutionary psychology and exceptional wildlife photography will find a fascinating companion in bonobo the forgotten ape this remarkable primate with the curious name is challenging established views on human evolution the bonobo least known of the great apes is a female centered egalitarian species that has been dubbed the make love not war primate by specialists in

many of the papers in this volume were first presented at the third international great apes of the world conference held july 3 6 1998 in kuching sarawak malaysia the editors of this volume the first in a two volume series are world renowned having dedicated most of their lives to the study of great apes the world s premiere primatologists ethologists and anthropologists present the most recent research on both captive and free ranging african great apes these scientists through deep personal commitment and sacrifice have expanded their knowledge of chimpanzees bonobos and gorillas with forests disappearing many of these studies will never be duplicated this volume and all in the developments in primatology book series aim to broaden and deepen the understanding of this valuable cause

the definitive unauthorized chronology cover

highly descriptive text and stylish photography help explain the life of man s closest cousins with brilliant photography and concise text the authors give us a close up look at our nearest relatives from the grizzled old male gorilla to the playful young orangutans so many of these creatures actions and habits are a reflection of those of human beings this book tells us of the varying lifestyles of gorillas chimpanzees bonobos gibbons and orangutans their social habits their environs and their relationship with humans and the importance of that to their long term survival author following a phd on rehabilitation and reintroduction of orangutans in borneo emmanuelle works as consultant primatologist for various ngos in africa and south america on primate conservation and reintroduction projects a writer and scientific journalist she collaborates with various french magazines including terre sauvage Ça m intéresse sciences avenir and geo she has also been a consultant for tv documentaries and has written several books such as Être singe with the photographer cyril ruoso and ces forêts qu on assassine an essay on deforestation in the tropics as well as several books for children emmanuelle is president of the jane goodall institut france and of the ngo awely working on human animal conflict resolution throughout the world colour throughout

from a scientist and writer e o wilson has called the world authority on primate social behavior comes a fascinating look at the most provocative aspects of human nature through our two closest cousins in the ape family

apes of the impenetrable forest the behavioral ecology of sympatric chimpanzees and gorillas offers students a scholarly and relevant study this is an account of a nine year project on the behaviour and ecology of chimpanzees and mountain gorillas living in the same african forest students are able to see the way in which a project is planned and put into action as well as the results

this five volume encyclopedia of anthropology is a unique collection of over 1 000 entries that focuses on topics in physical anthropology archaeology cultural anthropology linguistics and applied anthropology also included are relevant articles on geology paleontology biology evolution sociology psychology philosophy and theology the contributions are authored by over 250 internationally renowned experts professors and scholars from some of the most distinguished museums universities and institutes in the world special attention is given to human evolution primate behavior genetics ancient civilizations sociocultural theories and the value of human language for symbolic communication

experts investigate communicative flexibility in both form and usage of signals as the foundation of the evolution of complex communication systems including human language the evolutionary roots of human communication are difficult to trace but recent comparative research suggests that the first key step in that evolutionary history may have been the establishment of basic communicative flexibility the ability to vocalize freely combined with the capability to coordinate vocalization with communicative intent the contributors to this volume investigate how some species particularly ancient hominids broke free of the constraints of fixed signals actions that were evolved to communicate but lack the flexibility of language a newborn infant s cry for example always signals distress and has a stereotypical form not modifiable by the crying baby fundamentally the contributors ask what communicative flexibility is and what evolutionary conditions can produce it the accounts offered in these chapters are notable for taking the question of language origins farther back in evolutionary time than in much previous work many contributors address the very earliest communicative break of the hominid line from the primate background others examine the evolutionary origins of flexibility in for example birds and marine mammals the volume s interdisciplinary theoretical perspectives illuminate issues that are on the cutting edge of recent research on this topic contributors stéphanie barbu curt burgess josep call laurance doyle julia fischer michael goldstein ulrike griebel kurt hammerschmidt sean hanson martine hausberger laurence henry allison kaufman stan kuczaj robert f lachlan brian macwhinney radhika makecha brenda mccowan d kimbrough oller michael owren ron schusterman charles t snowdon kim sterelny benoît testé gert westermann

covers various aspects of zoology in four volumes including the behavior class evolution and physiology of both wild and domestic animals

in the human potential for peace an anthropological challenge to assumptions about war and violence renowned anthropologist douglas p fry shows how anthropology with its expansive time frame and comparative orientation can provide unique insights into the nature of war and the potential for peace challenging the traditional view that humans are by nature primarily violent

and warlike professor fry argues that along with the capacity for aggression humans also possess a strong ability to prevent limit and resolve conflicts without violence he draws on data from cultural anthropology archaeology and sociology as well as from behavioral ecology and evolutionary biology to construct a biosocial argument that challenges a host of commonly held assumptions

the wondrous remarkable and outlandish activities of animals have long captured our curiosity and no one has better explored or illuminated our fascination than jeffrey moussaieff masson bestselling author of the groundbreaking dogs never lie about love and when elephants weep masson s genuine passion for our two and four legged invertebrate flippered and finned friends has turned into his life s calling and earned him a reputation as one of our most provocative authorities on animal behavior now masson shares his vast knowledge in this comprehensive and charming volume featuring one hundred of his favorite animals drawing upon this affable expert s own experience and extensive research altruistic armadillos zenlike zebras offers fascinating facts colorful anecdotes and surprising tidbits on familiar creatures bottlenose dolphins hummingbirds kangaroos as well as lesser known yet equally entrancing critters bonobos kakapos wombats this guide includes gorgeous photographs and links to educational websites jacket flap

this book reviews the many conflicting theories about human nature those that stress our dark side and those that emphasize our goodness it then explores actual human behavior in societies around the world beginning with earliest and smallest known societies foraging people such as the kung san pygmies then various kinds of farming people and finally city dwellers it also focuses on human behavior during the 20th century providing detailed examples of human kindness and inhumanity it also examines human behavior under the most terrible kind of stress imaginable deadly prolonged famine how people respond to famine around the world is described with an emphasis on the killer famine that starved much of ireland from 1845 to 1850 many irish people died of starvation but unlike other parts of the world where starvation led the strong to kill and eat the weak irish culture forbade such killing and in reality it did not take place finally the book summarizes the evidence then concludes that even though people have biological urges that lead toward anti social behavior human rule systems can control most of these anti social predispositions

it s the story of the human race and god s unfailing presence this fascinating account of humankind from our beginnings in africa seven million years ago to the present blends history anthropology and spirituality to demonstrate that god has been and always will be with us from back cover
