popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

residential buildings have continuously improved in energy efficiency partly as a consequence of the introduction of energy regulations in many countries although better thermal properties and systems efficiency have lowered energy consumption for space heating in recent decades substantial differences in energy consumption in similar dwellings are still being observed these differences in consumption are thought to be caused by differences in occupancy patterns by quality of construction and by rebound effects this research addresses the effect of energy performance regulations and occupant behaviour on

energy consumption for space and water heating in dwellings built after the introduction of the energy performance regulations in the netherlands the results of this research show that improving the energy efficiency of buildings alone is not enough to decrease that energy consumption
