easily defeated and its people subjected into slavery to serve as free labor for germany invaded the vast country in june 1941 battle of the bulge the bloodiest battle in american history earned its name from the war correspondents who were covering the conflict the bulge was a protuberance 50 miles wide and 70 miles deep in the american lines the germans who had been in flight from the american invasion of normandy were not supposed to be in the ardennes region with its terrain deemed too difficult for tanks to move or soldiers to fight that deadly assumption left the ardennes and the town of bastogne insufficiently defended by 80 000 american soldiers most of whom had minimal battle experience battle of berlin the battle of berlin was a monumental battle between two adversaries who despised one another for the russians who had endured the horrific suffering and loss of lives in defending their nation against the nazi invasion the opportunity for vengeance seemed as if fate was on their side for the german civilians who remained in berlin the approach of the red army invoked terror the germans hoped that the americans would reach them first they would have preferred to surrender to the americans

what if things went differently in the 1930s and 40s giving victory to germany and japan in that scenario what would the world be like a century later this story of altered history begins in 2033 when alois adolf hitler iii the grandson of adolph hitler is reminiscing on the balcony of the reichskanzlei chancellery on how his grandfather accomplished victory in world war ii and about everything that has happened since read how history was rewritten and how the third generation of the third reich is doing this stunning story connects history with reality and fiction showing a possible future that could have happened in reality nazi germany made increasingly aggressive territorial demands threatening war if they were not met it seized austria and czechoslovakia in 1938 and 1939 hitler made a pact with joseph stalin and invaded poland in september 1939 launching world war ii in europe in alliance with italy and smaller axis powers germany conquered most of europe by 1940 and threatened great britain in fiction what changed to allow hitler to win the war find out in 2033 the century after as our wheel of history shows it could have spun in another direction just as easily

john norris shows how logistics though less glamorous than details of the fighting itself played a decisive role in the

outcome of every campaign and battle of world war two the author marshals some astounding facts and figures to convey the sheer scale of the task all belligerents faced to equip vast forces and supply them in the field he also draws on first hand accounts to illustrate what this meant for the men and women in the logistics chain and those depending on it at the sharp end many of the vehicles from supply trucks to pack mules and other relevant hardware are discussed and illustrated with numerous photographs this first volume of two looks at the early years of the war so we see for example how hitlers panzer divisions were kept rolling in the blitzkrieg a german division in 1940 still had around 5000 horses requiring hundreds of tonnes of fodder and the british armys disastrous loss of equipment at dunkirk this is a fascinating and valuable study of a neglected aspect of world war two
